

# Soil Nutrition Solutions to **BOOST** Your Alfalfa Program

**You Can't  
Stop  
Quantity**

**When You  
Feed With  
Quality**

In 2014, L-CBF was applied early regrowth prior to 2nd, 3rd, and 4th cuttings at five sites in southern Wisconsin. Overall yield and quality improvements compared to the control were substantial - adding 1.6 more ton of dry hay and 12 more points of Relative Forage Quality.
